MULTI DIRECTIONAL DUMP BODY

The great look and dependable performance of the Rugby Eliminator is now available with a new direction! Increase productivity by combining **side and rear dump capabilities** with the Eliminator-MD. You can now leave your trailer attached while dumping, which saves time and labor with every load.

The dumping direction is easily controlled with one lever and Rugby's standard tailgate release controls both the rear and the side release. The Eliminator-MD includes Rugby's patented EZ-LATCH. Standard vertical side and tailgate braces along with the Eliminator's sleek design offer the complete package to make your work truck stand out!

Coal chute shown is optional.
